SWT-0038	2682 Cedar Crest Boulevard	2682 Cedar Crest Boulevard		Stone four bay house with fanlight entry. This is a well preserved example of 18th century construction. The meticulous stonework and 9/6 window sashes are indicative of 18th century craftsmanship. The half-round window above the entrance door (arched entrance) point to the late 18th century. Judging from disturbed soil, the accompanying barn was probably located south west of the dwelling. There are no other surviving out buildings. SWT-0039	2700 Block of Mauch Chunk Road	2700 Block of Mauch Chunk Road		House and barn on opposite sides of road with different parcel numbers. Pennsylvania Standard barn with gable facing the road and forebay on the easterly elvation. This stuccoed-over-stone colonial farmhouse probably dates to the early 19th century. The 6/6 window sashes were common in the first half of the 19th century. The presence of a summer kitchen suggests that this dwelling was built before stoves came into common use in the 1830s. The barn and outbuildings, as well as the dwelling and summer kitchen, all appear to be well maintained. SWT-0040	2786 Cedar Crest Boulevard	2786 Cedar Crest Boulevard		Frame three bay house. This modest vernacular farmhouse appears to date to the late 19th to early 20th century. Its slate roof is probably original and is in very good condition. The 1/1 window sashes and the diamond shaped window on the first floor point to this time period. There does not appear to have been a barn associated with this swelling. Therefore, it may have been a tenant house for a nearby farm. There is a one car, detached garage with a hip roof to the rear of the property.		WOOD	Class IV	Historic Building - Early House	Private	DOMESTIC: Single Dwelling	DOMESTIC: Single Dwelling

The building on the southwest corner was built by John Dorney c . 1825 while the one on the southeast corner, by William Dorney in 1835. These two Georgian style houses are constructed of light grey fieldstone with a moderately pitched gable roof and interior brick gable chimneys. The 5 bay facades have plain window frames and a central pedimented doorway. Both houses have undergone extensive interior changes. The John Dorney house has been thoroughly modernized while the William Dorney house has been converted into a commercial establishment. In addition a large 2 story modern commercial warehouse has been added to the rear of the William Dorney House. Nevertheless, the houses are in good structural condition and with the Inn comprise an interesting crossroads settlement.	COLONIAL:Georgian	STONE	Class IV	Historic Building - Early House	Private
